

Promote stocking a maintenance kit for your FLUX drum and container pump to ensure minimal downtime as a result of an unexpected pump failure.

FLUX has spare parts kits for Model F424, F430, F425, F426 & F427 pumps and F416 Ex air motors on our shelves, ready to ship. Each rebuild kit will contain the standard wear parts for the pump or motor, which helps end users simplify the inventory of all spare parts into one convenient part number.

In addition, the FLUX maintenance kits are priced at a discount which means a more cost effective solution when compared to purchasing the parts individually.

For any pump model or pump length not listed, please consult the factory for kit pricing. For contents of each kit, please contact us or visit www.fluxcrg.com for a parts breakdown.

Simplify Your Spare Parts Inventory with FLUX Maintenance Kits!
